

Diapering

- ❖ Diapering cannot occur in the food preparation area
- ❖ A non-absorbent surface (e.g. plastic diaper bag changing pad, plastic placemat) must be used
- ❖ Disposable wipes must be used whether a child is wet or soiled
- ❖ The changing surface must be disinfected with bleach water solution after each diaper change, unless using disposable pads for each diaper change.
- ❖ A covered diaper disposal container must be used and lined with a disposable plastic bag
- ❖ Wet & dirty diapers may NOT be placed in the kitchen garbage

Hand Washing

With soap & water, dried on paper towels
(Hot water cannot be more than 120°)

Caregivers:

When?

- ❖ After each diaper change
- ❖ After helping child with toileting
- ❖ After washing the diaper changing surface
- ❖ After wiping kids' noses
- ❖ Before food preparation

Children:

When?

- ❖ After toileting
- ❖ After playing outside
- ❖ Before eating
- ❖ After eating
- ❖ After naptime
