

Fetal Alcohol Spectrum Disorder Training – Presentation by Barb Clark

Post – Test

1. FASD is brain damage
True or False
2. FASD symptoms are always prevalent at a young age, screening is not necessary in later childhood.
TRUE OR FALSE
3. It is common for children with FASD to “explode” with increased behaviors when they get home from school. This is because they do not respect their caregivers.
TRUE OR FALSE
4. Children with FASD will quickly learn when given clear, consistent consequences.
TRUE OR FALSE
5. Children with FASD have difficulty generalizing and transferring ideas from one situation to another.
TRUE OR FALSE
6. Time Out is an effective discipline strategy for children with FASD.
TRUE OR FALSE
7. When a child with FASD cannot answer a question they knew the answer to an hour ago they are likely acting out by pretending not to know.
TRUE OR FALSE
8. Children with FASD do not need as much supervision as they grow in to their teenage years.
TRUE OR FALSE
9. When a child with FASD is “raging” you should keep talking to the child and telling them to calm down.
TRUE OR FALSE
10. It is common for a child with FASD to have high anxiety.
TRUE OR FALSE
11. Circle the *inappropriate* strategy for behavior guidance:
 - a. Post picture charts to help with daily routines
 - b. Tell your child what you *want* them to do instead of what you *don't want* them to do.
 - c. Use a sticker chart to earn rewards/privileges
 - d. Use visual timers to prepare a child for a transition
